Quality

Horses are grazers and in their natural state would spend a large portion of their day feeding on a small-and-frequent basis. The horse's digestive system reflects this natural behavior and is designed to acquire the majority of its nutritional needs from forage. This is why high-quality forage is the foundation of the equine diet. But as a horse owner, you may find it challenging to find clean, good-quality forage on a consistent basis that is so important to your horse's diet. Chaffhaye is a superior alternative to baled hays and processed feed stuffs that allows you to take care of your horse the way nature intended.

Chaffhaye is crafted from premium-quality alfalfa forage. While still fresh, the forage is chopped, lightly misted with molasses, and compressed into an airtight bag to lock in freshness. A fermentation initiates in the bag, transforming the alfalfa or grass into a 'super soluble' forage. This "pre-digestion" process closely mimics the digestive activity in the hindgut of a healthy horse. In the bag, yeast, enzymes and other beneficial microorganisms unlock viable nutrition from the plant fiber and convert its nutrition into a form that is usable and more readily absorbable by your horse. The result is greater assimilation of energy, vitamins, and essential nutrients. Free of dust and mold, Chaffhaye alleviates the most common digestive and respiratory ailments that often plague horses.

Chaffhaye is a safe choice for feeding high-quality forage on a consistent basis, as well as providing live "beneficial" microorganisms that establish and maintain a healthy microbial balance in your horse. When used as a 100% hay replacement, your horse will demonstrate a marked improvement in digestion, immunity and well-being.

Minimally processed, Chaffhaye is the closest product to natural pasture you can feed your horses. Hence, it is premium "Pasture-in-a-Bag."

"We operate a horse pack station at the south entrance of Yosemite National Park. Chaffhaye has fit very well with our program. It is easy to pack, the horses do great, and there is a lot less manure."

California

"We have really noticed a difference in the amount of bloom on our three year olds, and the only thing we've done different is feed Chaffhaye. We are seeing great results using chaffhaye as the complete forage for some horses and as additional forage for others! I would definitely recommend it.

Chaffhaye

Pasture·in·a·Bag

www.Chaffhaye.com

100% HAY REPLACEMENT

Benefits

Top Quality – Chaffhaye is premium alfalfa harvested at optimal plant maturity to maximize nutrients. Chaffhaye is a supreme source of fiber, protein, and nutrients for horses. Nutritionally, 1 bag of Chaffhaye is equal to 1.5 bales of good-quality hay.

Superior Digestibility – Chaffhaye is a natural source of yeast, beneficial enzymes, and live microorganisms that support healthy digestion and absorption of nutrients. Chaffhaye helps establish healthy microflora in the gut of weaning animals and reduces digestive ailments, including colic and impaction. Being easily masticated and digested, Chaffhaye is the perfect solution for senior horses.

Low Sugar / Starch – The natural fermentation reduces the levels of sugars and starches making Chaffhaye a safe choice for insulin resistant, laminitis or obese horses.

Dust Free – Chaffhaye retains natural plant moisture and is 100% dust free. This makes it ideal for horses with coughing and respiratory ailments.

Superior Palatability – Soft and leafy like pasture, Chaffhaye provides a pleasant aroma and is coarsely chopped to release enzymes and maintain good gut motility. A kiss of molasses ensures that every last bit is licked clean.

Easy Storage – Double compressed, Chaffhaye occupies 1/3 the space of baled hay. Weatherproof packaging allows storage outdoors with no loss of nutrition.

Easy Transport – Sturdy 50-pound bags are convenient for travel and feed out.

Less Waste – Horses normally eat 100% of Chaffhaye, including stem matter. This means less waste and cleaner stalls. Because of the higher nutrient absorption of Chaffhaye, horses generate up to 50% less manure, reducing fly populations and barnyard cleanup.

Cost Effective – Chaffhaye is much more nutritious than hay, so the amount of supplements and hard feeds can be greatly reduced. Other considerations are lower feeding and storage losses. A long shelf life with no loss of nutrition means no wasted feed.

Certified Weed Seed Free – Chaffhaye is ideal for habitats where foreign seeds are controlled or prohibited by law.

Blister Beetle Free – Chaffhaye is safe for horses.

Nutrition

Guaranteed Nutrition – Chaffhaye is tested by independent laboratories to verify nutritional forage quality. *Guaranteed.*

Guaranteed Analysis (On a "As Fed" Basis)	Chaffhaye Alfalfa
Crude Protein	9%
Crude Fat	1.8%
Crude Fiber	11%
Total Digestible Nutrients (TDN)	29.30%
Relative Feed Value (RFV)	160+
Calcium (Ca)	0.70%
Phosphorus (P)	0.10%
Copper (Cu), ppm	3.6 ppm
Non Structural Carbohydrates (NSC)	3.5%-4.2%
Starch	1.2%-1.5%

Getting More With Increased Digestibility

The Fermentation of Chaffhaye greatly increases the digestibility of forages for Equine. Based on studies comparing the digestibility of increased as follows:

Digestibility of Dry Matter	57%
Digestibility of Crude Protein	144%
Digestibility of Crude Fiber	46%

“Chaffhaye is excellent for horses with poor teeth as it can be digested with little mastication. I routinely recommend Chaffhaye for horses with heaves, and have great success controlling emphysema. I have seen no incidences of colic in any horse on Chaffhaye.

Colorado”

Feeding

Feeding Instructions

Chaffhaye is a 100% hay replacement

Weight of Horse (lbs)	400	800	1000	1500	2000
Daily Chaffhaye Amount (lbs)	6.0	12.0	15.0	22.5	30.0

Chaffhaye is designed to meet the forage portion of your horse's diet. Depending on such factors as age, breed, workload, and available pasture, an energy and/or vitamin and mineral supplement may be needed. Consult a Chaffhaye representative or your equine nutritionist for further information.

After observing your horse for a period of time on Chaffhaye, you may want to increase or decrease by up to 10% to obtain the desired overall body condition and appearance.
